

Pocket Guide to the Orchids of Britain and Ireland

The orchid family is one of the largest plant families in the world. It is at its most diverse in the tropics, where its exotic and colorful flowers are truly breathtaking. Britain and Ireland have just 56 species of wild orchids, some of which are rare or scarce, while others are surprisingly inconspicuous. Yet whether large or small, all orchids share flamboyant flower structures and incredible beauty. This new Pocket Guide covers all 56 species of British and Irish orchids, with concise text, breathtaking color photographs, and accurate range maps based on compilations made by the Biological Record Centre. The book is derived from the highly acclaimed Orchids of Britain and Ireland: A Field and Site Guide, also by Simon Harrap.
